

ASSIGNMENT-4

Write a code and connections in wokwi for ultrasonic sensor. Whenever distance is less than 100 cm"send" alert to IBM Cloud and display in device recent events.

```
const int trigpin=3;

const int echopin=4;

const unsigned int maxdist=23200;

void setup(){

  pinMode(trigpin,OUTPUT);

  digitalWrite(trigpin,LOW);

  pinMode(echopin,INPUT);

  Serial.begin(9600);

}

void loop(){

  unsigned long t1;

  unsigned long t2;

  unsigned long pulsewidth;

  float cm;
```

```
float inches;

digitalWrite(trigpin, HIGH);

delayMicroseconds(10);

digitalWrite(trigpin, LOW);

while(digitalRead(echopin)==0);

t1=micros();

while(digitalRead(echopin)==1);

t2=micros();

pulsewidth=t2-t1;

cm=pulsewidth/58;

inches=pulsewidth/148.0;

if(pulsewidth>maxdist){

    Serial.println("Out of range");

}else{

    Serial.println("Distance in cm: ");

    Serial.println(cm);

    if(cm<100){

        while(true){

            Serial.println("Alert");

        }

    }

}

delay(1000);

}
```
